

MAKING THE DISPLAY

- Use a trifold display board that unfolds to 36" tall by 48" wide.
- Organize information like a newspaper so it reads top to bottom and left to right.
- Make the title font large enough to be read from far away, and the rest of the text large enough to be read from a few feet away.
- Include pictures, diagrams, and charts that will make your information interesting to read.
- Make sure to check the rules and requirements of your science fair. Layout requirements may be different for your fair but below is an example of what your display might look like.
