

WRITING YOUR REPORT

1. Be sure to follow your class's instructions on writing your final report. Generally science fair reports will be outlined as below:

1. **Title Page** - The title of your experiment, name, and date.
2. **Abstract** - A paragraph summarizing your final report.
3. **Safety Sheet** - Outline anything possibly dangerous in your experiment, such as chemicals, glass, fire, etc.
4. **Table of contents**
5. **Hypothesis** - Discuss the purpose of the experiment and the variables of your setup.
6. **Research on your topic** - Summarize the research you conducted on your background topic.
7. **Materials List** - A list of everything needed to conduct the experiment.
8. **Step by step experiment instructions** - Write your instructions so that anyone can duplicate your experiment the exact way you did it.
9. **Data results and analysis** - A summary of your data and findings. Include any charts and graphs you made.
10. **Conclusions** - Discuss what you learned from the experiment and if your results supported or did not support your hypothesis.
11. **Acknowledgements** - Thank anyone who helped you with your project.
12. **Bibliography** - a list of all the resources you referenced in your report. This will include books, magazines, journals and websites.
